Dr. Charles Baskerville, of Horn Lake, Mississippi, and a member of the Howard medical corps, was out on the streets yesterday, taking a walk between a cane and an univeila. He will be ready to report to Dr. Mitchell for duty in a few days. The physicians state that many cases called relapses of yellow-fever are improperly named. They have discovered that many of these misnamed cases are malarial fevers accompanied with abscesses in the body—a type of disease totally distinct from yellow-fever.

—Mr. John E. Spicer has buried of his un-cle's family, in the past week, the following per-sons: Mrs. Julia M. Owen, George Qwen, Thomas J. Owen, and Miss Lizzle Owen. Miss Emma Owen is convalescent. Mr. Spicer reports the surviving members of his family well. -Absentees should not think of returning — Assentees should not think of returning of Memphis until advised to do so by the board of nealth. It has not been jet determined whether Ed has the fever, but an ounce of preventive is worth a pound or quart of cure.

-Among the prominent ones who have stood up to the rock without going down beneath the lance of the Yellow Knight are City Comptroller James A. Newsom, Jeptha Fowlkes, Ed Beasley and that bearded old sinner of the Avalanche. They are proof against any attack at this stage of the game, and will go through with flying colors. -The Chickasaw Guards are still sojourning at St. Louis. The Bluff City Grays are doing splendid service, on active duty, at Camp Joe Wil-liams. The M'Clellan Guards (colored) are likewise on duty at Camp Joe Williams, and the Zouaves (colored) are guarding the commissary stores, etc., in the city. Several of the Bluff City Grays died of the fever while on duty.

This makes three hundred and fifty-eight thousand one hundred and forty-three rations to date. MEMPHIS, October 10, 1878. Dr. N. C. Knox, Courtland, Mississippl: DEAR DOCTOR—In relation to my mode of treating a pellow-fever patient, I submit the following Eurpty the stomach of the patient, if a meal has been taken within the four hours before the invasion and forty-three rations to date.

Expty the stomach of the patient, if a meal has been taken within the four hours before the invasion of the disease. Commence treatment by giving ten or twelve grains of caloinel, followed in six hours afterward by a dose of oil; reaction is established by a mustard foot-bath; perspiration is to be kept up for twelve or sixteen hours. If the temperature ranges above one bundred and two, sponge with cold water and whisky (equal parts) from head to foot for forty minutes; then rest thirty minutes. This should be kept up until the temperature is brought down to one hundred and one, and if the patient is restless, keep up the sponging with tepid water and whisky after the fever has entirely subsided. This, in my opinion, is the only measure to secure quiet rest and sleep. Give two ten-grain doses of quinine within the first twenty-four hours. As a diapho etic and diuretic, use bicarbonate of potash, thiorate of potash and sweet spirits of nitre.

For the first forty-eight hours use tincture of gelseminm. If after the subsidence of the fever there should be a rise of temperature at night, give quinine freely the day following. Repeat this each day as long as the temperature rises at night.

After the first twenty-four hours of illness there must be absolute quiet of body and mind for the next five days I do not permit any one to go in the sick-room but myself and nurse; in f-ct, the world closes on the patient until I turn him loose; he sees nothing, hears nothing, and remains perfectly quiet in bed.

The use of the bed-pen is essential to recovery. When the fever subsides give the blandest articles of diet, such as milk, and lime-water, and rice-water, followed by chicken broth; no solid food to be taken for ten days.

I do not permit my patient to sit up in bed until the ninth or tenth day.

Give small quantities of ice and draughts of ice water or any cold teas at short intervals and in small quantities. down beneath the tidal wave of the plague, C. L. Anderson and James W. Anderson. Coroner and Esquire G. W. Caldwell, who is now in the country, is exofficio sheriff of Sheiby county, but he is absent and may not appear to assume the dutier of the important office during the prevalence of the yellow-fever in the city. Some three mile out, after visiting a patient, he discovered a small pig, some weeks old, trotting under his buggy. It could not drive it back, so he kept on visiting his numerous patients. The pig remained under his buggy, and when the doctor got out the little animal laid down on the ground, only to get up and continuits trot, grunts and gallop, when the doctor moves onward. Irritability of stomach that comes on with the invasion of the disease will usually subside within twelve or eighteen hours, without any treatment addressed to that particular sympton. If it appears later, I use sinapisms or blistering ointment to slight vesication. Creosote, in small doses, I use sometimes with decided advantage.

MEMPHIS, TENN, September 7, 1878, J. A. HAYES, Cashier. EMMET BANK OF MEMPHIS.

WING to the prevalence and continued malignity of the yellow-fever, I have this day closed the Bank. The fever having invaded the cashier's family and left me without assistants. I thought this the most prudent course to pursue. Funds deposited at the German National Bank. I will make my head-quarters with the Ninth National Bank of New York, and am prepared to respond to all calls of depositors. Special deposits in my charge. I hope the abatement of the fever will permit me to resume business at an early day.

TO PREVENT

SIMMONS Liver Regulator

It Saved the People of Savannah, Ga.
Who Used it During the Terrible

MESSES. J. H. ZEILIN & Co — Gentlemen: We, the ndersigned, Engineers on the Georgia Central Ralload, in grateful obligation for the benefits we reundersigned, Engineers on the Georgia Central Railroad, in grateful obligation for the benefits we received from the use of Simmons Liver Regulator during the Yellow-Fever Epidemic in Savannah, Georgia, in the summer and fall of 1878, desire to make the following statement: That during the sforesaid epidemic we used the medic ne known as Simmons Liver Regulator, prepared by J. H. Zellin & Co., and though exposed to the worst miasmatic influences of the Yellow-Fever by going in and coming out of Savannah at difference hours of the night, and also in spendir gentire nights in the city during the prevalence of this most fatal epidemic, with but the single exception of one of us, who was taken siek, but speedily recovered, we continued in our usual good health, a circumstance we can account for in no other way but by the effect, under Frovidence, of the habitual and continued use of Simmons Liver Regulator while we were exposed to this Yellow-Fever malaria.

Respectfully jours,
C. B. PATTERSON, JAMES L. MALLETTE,
JOHN R. COLLINS, MELTON F. COOPER.

The Genuine Simmons Liver Regulator or Medicine is wrapped in a clean, neat WHITE WRAPPER, with the red symbolic letter stamped upon it in the form of a ribbon gracefully curved into the letter Z, embracing the emblems of our trade, Spatula, worter and Graduate, with the words A. Q. SIMMONS LIVER REGULATOR or MEDICINE thereon; also, observe the signature of J. H. ZEILIN & CO., in red ink, on the side, Run no risk by being induced to take substitutes. Take no other but the original and genuine. Manufactured only by J. H. ZEILIN & CO.

A Non-Explosive Oil Solar Light is highest test made from superior crude; is without color, odor or smoke; is spring-water white color; will not explode while burning in a lamp nor in any way, as it does not contain any of explosive compounds so frequently met with ordinary oils for illuminating. A lamp with Solar-Light OIL, if upset or broken accidentally, will not explode or burn. It is free from all the dangerous gases which are usually found in illuminating oils made from petroleum, by the use of which has been caused so much destruction of life and property.

PREVENTIVE AND CURE FOR YELLOW FEVER

A COORDING to the most intelligent medical opinlon yellow-fever is intensified malaria, and Dr.
William Alex Green, of Georgia, member and exvice-president of Georgia Medical Association, member of State boam of physicians, and chief surgeon
of artillery of A. P. Hill's corps, after great experience in malarial and yellow-fever, indorses and
recommends most highly in the Cincinnati Medical
Neves, the Bridger (V.) Springs Alum and Iron
Mass, as a preventive and cure for both of these
dreadful diseases. He states that this mass should
be taken rapidly and in large doses—saturating the
blood with it and putting the system under its infigence as speedily as possible; that it lessens De
pains in the head and limbs, and also the nateral
that under its use the urine rapidly loses its the
bloody character, becoming clear and limpid; that
the paroxyms are rendered milder, less frequent and
of shorter duration; that it is also most beneficial from
the very moment the acute stage subsides, and during convalencence; that he places great reliance in
this mass, using such other adjunct treatment as the
course of the disease may suggest. The Cincinnati
Medical Neves unges all to try this remedy, that its
efficacy may be known and utilized.

This mass may be had of druggists, or ordered
from the Beafford Alum and Iron Springs Company,
Lynchburg, Virginia, and it can be sent by mall,
post-paid, or express at fifty cents or one dollar a
package, or two dollars and a half or five dollars for
half dozen.

This mass will be sent free to rellow-fever unferers who are unable to pay for it, and trial supply will be sent without charge to physicians desiring to test it in their practice. To Yellow-Fever Sufferers Five out of six of my household, near Moscow, Tennessee, have lately had the rellow-fever, prevailing in that section. All of them have recovered, the attacks being mitigated and their recovery due, as I believe to the use of **Bedford Alum and Iron Springs Mass**, which was used in their cases, and before they were attacked. I make this statement for the benefit of others who may be afflicted with this dread disease, and to put in their reach the knowledge of this great remedy. S. M. DAVIS. September 21, 1878. Dr. Jones, in the New Orleans Medical and Sur scal Journal, recommends mineral tonics in yellow-fever and in maiarial ha-maturia. The Bedford Alum and Iron Springs Mass contains ten parts of iron in every hundred parts, and has no equal as a tonic. For sale by S. MANSFIELD & CO.
